Subject: Congratulations and invitations from SCIRP on your academic achievements

Dear Dr. Junji Haruyama,

I am Amy Wu, working at Scientific Research Publishing (www.scirp.org). On behalf of SCIRP, I would like to express heartfelt thanks for your everlasting supports to SCIRP.

You published an article titled "Electronic properties of nanopore edges of ferromagnetic graphene nanomeshes at high carrier densities under ionic-liquid gating" (<http://www.scirp.org/journal/PaperInformation.aspx?PaperID=41958>)

on Materials Sciences and Applications in 2014.

It gets a lot of attention and has 706 downloads and 2189 views up till now.

Thanks for your contribution to the academic research.

We're wondering whether you have any new achievements in your research field or whether you have the willing to publish a book which contains all of your research works. Please feel free to contact us if you have any interest in cooperation with us about this issue. We would appreciate your early reply.

Best wishes for you!

Sincerely,

Amy Wu
